# Tents

## Extreme 2

The Extreme 2 is an ultra-light tent designed for high-altitude use.

Extreme tent complete with vestibule

## Manaslu 2

Manaslu 2 is the 4 season, 2 person tent for all those seeking space, minimum weight, easy set up and top performance in terms of reliability, thanks to the duraluminium structure with radial joints.

## Hekla

Hekla is the new range of 1-, 2-, and 3-person 4-season tents for climbers and trekkers who need easy set-up and top performance in terms of reliability, versatility and thermal insulation.

# Tents

P. 4

## HighLab

---

High Lab tents represent the height of Ferrino research and technology. They are the result of tests performed in a laboratory and at high altitudes for the purpose of supplying prompt and leading-edge solutions to professional users who need to face extreme conditions in terms of the elements and the environment.

P. 16

## 4 Seasons

---

This is a range designed with attention to even the smallest details and suitable for mountain use. Made using the best materials available, the range has all of the characteristics that make Ferrino quality tents stand out from the rest: resistance to the elements, excellent design, functionality, light weight and fast set-up and taking down.

## Features

---

### Triple Reinforcement

---

3 layer construction floor corners reinforcement.

### R.B.System

---

Fly sheet reinforcement system in Oxford 210 D polyester fabric. Works like a harness, to provide higher wind/storm resistance.

### Liftable Flap

---

To get the tent adjusted according to the weather conditions – to get it more closed or open either for a better ventilation or to protect the inner tent in case of bad weather conditions.

### Fire Retardant

---

Fire retardant fabrics comply to the specifications of the CPAI-84 standard.

### Tape Adjustment

---

To attach and regulate the distance of the fly-sheet to the base.

### Poles

---

Tempered 7001 T6 aluminium alloy poles with exceptional characteristics of lightness, resistance and elasticity

**Extreme 2:** High-strength carbon poles designed and optimised for alpine use by EASTON®

### Floor Corner

---

To fix the tent to snow with ice-axes, skis or other moorings.

### Poles-guy Line

---

Guy lines connected to the poles through the external ventilations sleeves, for a higher stability.

### Pegs

---

All pegs High Lab line are made of aluminium.

## Extreme 2

**90134QAA**

\* excluding case and pegs

**The Extreme 2 is an ultra-light tent designed for high-altitude use.**

**Weighing in at just 890 g, its aerodynamics tested under extreme conditions in a wind tunnel, and its high-performance materials make it the ideal tent for the most extreme weather conditions.**

**The internal carbon pole system by Easton® allows for quick and secure assembly even in strong wind, without the risk of losing tent elements.**

**Structure:** Dome

**Materials:** Floor and Bio-Based Dyneema® Fiber inserts 20,000 mm 25 gm2 | Double roof ECOSENSOR™ 10D Recycled Nylon | PU Membrane waterproof 6000 mm, breathability 30.000 g/m2/24h, 56 gm2 | Taped seams to ensure total waterproofing | Three-layer construction to reinforce the basin corners.

**Poles:** Easton® carbon poles | 7075 aluminium pegs with a cross-section.

**Entrance and ventilation:** Front entrance with ventilation window | Hood and ventilation cuffs can be closed from the inside.

**Storage:** Internal pocket | Removable storage on the tent ridge.

**Accessories:** Tape loops on the floor corners to anchor the tent with skis, ice axes, or deadman anchors when mounted on snow | "Multi-point" reflective guy lines system prevents breaking and deformation of the poles in case of strong wind | Fluorescent guy line tensioners | 100% waterproof Bio-Based Dyneema® Fiber tent sack with "roll-up" top closure | Repair kit | Video instructions enabled with QR code.

Dyneema®

## Extreme 2 Apsis

90137QAA

The Extreme 2 apsis has been developed to fit perfectly and securely to the Extreme 2 tent, thanks to the multiple guy line system. It is devised to give users extra space and comfort, serving to increase the (outside) living space of the tent.

**Materials:** : Dyneema® Fabric 26 g/m2 - 20.000 mm. waterproofness. | Reinforcements in ECOSENSOR™ Recycled Nylon Membrane 6000 mm, 56 gm2 10D | Transparent TPU window | Taped ridge seams

**Poles:** Tempered 7001 T6 aluminium alloy poles featuring lightness, strength, and elasticity | 1 pre-connected aluminium pole | External poles | "V shape" aluminium pegs

**Entrance and ventilation:** Front entrance with double door. It can be fully opened and rolled up | Ventilation hood can be closed from the inside

**Accessories:** TTape loops on the corners to anchor the apsis when mounted on snow using ice axes, skis, or other deadman anchors | Hook system for fastening to the tent's ridge pole to facilitate assembly and increase stability | Reflective wind-resistant guy lines | Fluorescent guy line tensioners | repair kit included | Dyneema® Fabric sack | Video instructions enabled with QR code.

## Extreme 2 footprint

90138QII

Accessory compatible with Extreme 2 tent, it enhances floor protection when used on snow and rough terrains.

**Materials:** 100% Recycled 70D Polyester Ripstop, 85 g/m<sup>2</sup>, with polyurethane coating, waterproof to 8000 mm. Water repellent and FR treated.

**Accessories:** Corner fastening system with buckle adjustment | Stuff sack in Dyneema® Fabric

100

MIN 1,9 kg\*  
MAX 2,2 kg

## Maverick 2

99067 QAA

\* fly sheet and poles only

**Maverick 2 is the compact, ultralight 2 person tent with single wall and waterproof and breathable membrane. It is the result of laboratory and highaltitude testing and is a great, technologically advanced answer to the problems of professional users needing to deal with extreme conditions.**

**Structure:** Double cross

**Materials:** Double roof ECOSENSOR™ Recycled Nylon Membrane 6000 mm, 56 gm<sup>2</sup> 10D | Floor: Polyamide 70D, 95 g/m<sup>2</sup>, polyurethane coating waterproofness 8000 mm | Taped seams to ensure total waterproofness | Three-layer construction to reinforce the corners of the basin

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 2 shockcorded aluminium poles of equal length for easier set up | External poles | "V shape" aluminium pegs

**Entrance and ventilation:** Front vestibule | Front door with exterior mosquito net | Ventilation sleeves and outlets that close from the inside

**Storage:** Inside pockets | Gear loops

**Accessories:** Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings. | Storm guy lines | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code

## Snowbound 2

99098 DAFR

\* fly sheet, inner tent and poles only

**Snowbound 2 is the 2 person tent built to provide top performance when it comes to wind resistance, thanks to a system of reinforcements on the perimeter structure (RB) and to its geodesic shape. This tent is the ideal shelter for professionals facing expeditions at high altitudes or on glaciers, in base camps or areas with lots of exposure to wind and extreme weather conditions**

**Structure:** Geodetic

**Materials:** Fly sheet in 50D, 80 g/m<sup>2</sup>, Polyester Ripstop coated with polyurethane, waterproof to 4.000 mm. Water repellent, with FR treatment | R.B. System: fly sheet with reinforcement band on the perimeter in 210D polyester Oxford that acts as a harness for guaranteed better resistance in case of adverse weather conditions | Inside waterrepellent and breathable 70D, 55 g/m<sup>2</sup>, Polyester Ripstop, with FR treatment | Floor in 70D, 95 g/m<sup>2</sup>, Polyester coated with polyurethane, waterproof to 8.000 mm. Water repellent, with FR treatment | Transparent front window in TPU | Taped seams to guarantee total waterproofing | Threelayer construction to reinforce the floor corners

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 4 shockcorded aluminium poles of equal length for easier set up | 1 aluminium veranda pole in a different colour | Inner tent overhung using continuous mesh sleeves | "V shape" aluminium pegs

**Entrance and ventilation:** 1 vestibule and rear entrance | Fully opening room doors that fold into a special pocket | Ventilation sleeves that can be closed from the inside | Liftable flap on the entrance to the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

**Storage:** Internal storage pockets | Gear loops

**Accessories:** Adjustable fly sheet distance from the base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Guy lines to secure the tent connected directly to the poles for maximum stability | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings.

## Snowbound 3

99099 DAFR

\* fly sheet, inner tent and poles only

**Snowbound 3 is the 3 person tent built to provide top performance when it comes to wind resistance, thanks to a system of reinforcements on the perimeter structure (RB) and to its geodesic shape. This tent is the ideal shelter for professionals facing expeditions at high altitudes or on glaciers, in base camps or areas with lots of exposure to wind and extreme weather conditions**

**Structure:** Geodetic

**Materials:** Fly sheet in 50D, 80 g/m<sup>2</sup>, Polyester Ripstop coated with polyurethane, waterproof to 4.000 mm. Water repellent, with FR treatment | R.B. System: fly sheet with reinforcement band on the perimeter in 210D polyester Oxford that acts as a harness for guaranteed better resistance in case of adverse weather conditions | Inside waterrepellent and breathable 70D, 55 g/m<sup>2</sup>, Polyester Ripstop, with FR treatment | Floor in 70D, 95 g/m<sup>2</sup>, Polyester coated with polyurethane, waterproof to 8.000 mm. Water repellent, with FR treatment | Transparent front window in TPU | Taped seams to guarantee total waterproofing | Three layer construction to reinforce the floor corners

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 4 shockcorded aluminium poles of equal length for easier set up | 1 aluminium veranda pole in a different colour | Inner tent overhung using continuous mesh sleeves | "V shape" aluminium pegs

**Entrance and ventilation:** 2 vestibules | Fully opening room doors that fold into a special pocket | Ventilation sleeves and outlets that close from the inside | Liftable flap on the entrance to the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

**Storage:** Internal storage pockets | Gear loops

**Accessories:** Adjustable fly sheet distance from the base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Guy lines to secure the tent connected directly to the poles for maximum stability | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings.

## Pilier 2

99068 LAAFR

\* fly sheet, inner tent and poles only

**Pilier 2 is the perfect tent for use at high altitudes with maximum performance in terms of wind resistance. The system of external poles means that set-up is quick in cases of bad weather and prevents the inner tent from getting wet.**

**Structure:** Geodetic

**Materials:** Fly sheet in 50D Polyester Ripstop, 80 g/m<sup>2</sup>, with polyurethane coating, waterproof to 4000 mm. Water repellent and FR treated. | Inner tent Water-repellent and breathable 70D Polyester Ripstop, 55 g/m<sup>2</sup>, with FR treatment. | Floor 70D, 95 g/m<sup>2</sup> polyester, coated with polyurethane, waterproof to 8,000 mm, water repellent and FR treated | Clear window in TPU | Taped seams to guarantee total waterproofing | Three-layer construction to reinforce the floor corners

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 poles in shock-corded aluminium in different co-

lours for easier set up | Inner tent hung from the fly-sheet using elastic tapes, rings and toggles | "V shape" aluminium pegs

**Entrance and ventilation:** Front vestibule | Room door with mosquito net exterior that opens out fully and folds into a special pocket | Ventilation sleeves that can be closed from the inside

**Storage:** Internal storage pockets and loops | "Ambient light" light diffuser pockets | Removable storage on the ridge, inside the tent

**Accessories:** System to fasten the fly-sheet to the inner tent with aluminium buckles for optimum tensioning between the two parts. | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings. | Multipoint guy line system to prevent the breakage or deformation of poles in strong winds | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code

## Pilier 3

91163 LAAFR

\* fly sheet, inner tent and poles only

**Pilier 3 is a 3 person tent built to withstand the harsh climate conditions at high altitude**

**Structure:** Geodetic

**Materials:** Fly sheet in 50D, 80 g/m<sup>2</sup>, Polyester Ripstop coated with polyurethane, waterproof to 4.000 mm. Water repellent, with FR treatment | Inside waterrepellent and breathable 70D Polyester Ripstop, with FR treatment | Floor in 70D, 55 g/m<sup>2</sup>, Polyester coated with polyurethane, waterproof to 8.000 mm. Water repellent, with FR treatment | Transparent front window in TPU | Taped seams to guarantee total waterproofing | Three layer construction to reinforce the floor corners

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 poles in shockcorded aluminium in different co-

lours for easier set up | Inner tent hung from poles with continuous mesh sleeves | "V shape" aluminium pegs

**Entrance and ventilation:** Front vestibule that rolls up fully | Rear vestibule | Room door with mosquito net exterior that opens out fully and folds into a special pocket | Ventilation sleeves that can be closed from the inside

**Accessories:** Adjustable fly sheet distance from the base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings. | Storm guy lines | Fluorescent guy line pulls | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code

## Campo Base

**90130 LAA**

**Campo Base is an extremely versatile expedition tent that is perfect as a base camp, mess tent, or as a support for logistics. The removable inner tent means it is also perfect for sleeping quarters.**

**Structure:** Geodetic

**Materials:** Fly sheet in thermal insulating, aluminised 210D Polyester Oxford, waterproof to 4,000 mm, water resistant, fireproof to CPAI 84 standard | Inner tent in water-repellent, breathable 70D Polyester, fireproof to CPAI 84 standard | Fully welded inner tent floor in Polyethylene, waterproof to 10,000 mm, water resistant and fireproof to CPAI 84 standard | Fully welded additional floor in Polyethylene, waterproof to 10,000 mm, water resistant and fireproof to CPAI 84 standard | Taped seams in the fly-sheet to guarantee total waterproofing

**Poles:** Poles in 7001 T6 tempered aluminium alloy for light weight, strength and elasticity | 4 shock-corded aluminium poles, diameter 13 mm, all the same length for easier setup | 2 inner tent ridge poles in shock-corded aluminium, diameter 8.5 mm

and the same length for easier setup | 2 steel poles for vestibule | Reinforced steel pegs, 25 cm long and 2 mm thick

**Entrance and ventilation:** Front vestibule door with window and side rain protections that roll up completely | Rear entrance | Ventilation sleeves | Lifiable snow flap for excellent ventilation (when rolled up) or protection in case of bad weather (if unrolled) | Inner tent doors and windows with outer mosquito net and fully closable inner cover.

**Storage:** Internal storage pockets | Gear loops

**Accessories:** Multipoint guy line system to secure the tent and provide greater structural resistance in case of strong winds | Tape to adjust the distance from fly-sheet to base, for excellent tensioning and to allow more or less air to enter, based on the climate and weather conditions | Tape loops on the corners of the fly-sheet to secure the tent, if set up on snow, with ice axes, skis or other anchorages | Reinforced stuff sack in polyethylene with compression straps and double carry handle | Reinforced polyethylene bag for poles and pegs | Repair kit | Set up instruction video activated by QR Code.

## Colle Sud

99094 W

\* fly sheet, inner tent and poles only

**Colle Sud is an expedition tent with stable, robust geodesic structure. Can sleep up to 6 people.**

**Structure:** Geodesic

**Materials:** Fly sheet in aluminised polyester Oxford, Water Resistant to 4.000 mm | Inner tent in waterrepellent, breathable nylon Ripstop | Aluminised polyester Oxford floor, Water Resistant to 4.000 mm | Taped seams to guarantee total waterproofing

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong

and elastic | 7 shockcorded duraluminium poles, diameter 13 mm | Differentcoloured poles for easier set up | Inner tent overhung using continuous mesh sleeves | Aluminium pegs

**Entrance and ventilation:** Double entrance | Ventilation sleeves and outlets | Auxiliary vents | Lifiable snow flap

**Storage:** Inside pockets

**Accessories:** Guy lines to secure the tent connected directly to the poles for maximum stability | Stuff sack for tent included | Repair kit included

## Features

---

### Triple Reinforcement

---

3 layer construction floor corners reinforcement.

### Fire Retardant

---

Fire retardant fabrics comply to the specifications of the CPAI-84 standard.

### Liftable Flap

---

To get the tent adjusted according to the weather conditions – to get it more closed or open either for a better ventilation or to protect the inner tent in case of bad weather conditions.

### Poles

---

Tempered 7001 T6 aluminium alloy poles with exceptional characteristics of lightness, resistance and elasticity

### Tape Adjustment

---

To attach and regulate the distance of the fly-sheet to the base.

### Ventilation Outlets

---

Storm proof ventilation outlets

### Guy Ropes System

---

Multipoint guy rope system that prevents poles from bending and breaking in case of strong winds.

### Floor Corner

---

To fix the tent to snow with ice-axes, skis or other moorings.

### Recycled Fabric

---

**You are buying a product made from 100% recycled fabric.**

## Hekla 1

99010 RAAFR

\* fly sheet, inner tent and poles only

**Hekla is the new range of 1-, 2-, and 3-person 4-season tents for climbers and trekkers who need easy set-up and top performance in terms of reliability, versatility and thermal insulation.**

**Shock-corded poles and spacer pegs increase reliability and stability**

**Structure:** Dome

**Materials:** Fly-sheet in Nylon Double Ripstop 50D, 75 g/m<sup>2</sup>, coated with heat-insulating aluminised polyurethane, waterproof to 3000 mm, FR treated | Inner tent in polyester Ripstop 70D, 55 g/m<sup>2</sup>, water-repellent and breathable, FR treated | Floor in 100% Recycled polyester 70D, 95 g/m<sup>2</sup>, heat-insulating polyurethane coating, waterproof to 8000 mm, water-repellent, FR treated | Taped seams in fly-sheet and floor | Three-layer instruction to reinforce the floor corners.

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 5 shock-corded duraluminium poles in different colours for easier set up | Inner tent hung from fly-sheet with sleeves | "Y-Pegs" in aluminium

**Entrance and ventilation:** Front vestibule | Fully opening door with mosquito net exterior | Ventilation sleeves with stormproof system.

**Storage:** Storage pockets | Gear loops

**Accessories:** Tape loops in floor corners to secure the tent, if set up on snow using ice axes, skis or other dead weights | Reflective storm guy-lines | Tensioning system in fly-sheet bottom corners | Internal lamp hook | Stuff sack | Repair kit included | Instruction video activated with QR Code

## Solo

99057 LAAFR

\* fly sheet, inner tent and poles only

**1 person, 4 season tent for all those seeking minimum size and weight**

**Structure:** Double cross

**Materials:** Flysheet in 100% Recycled 70D Polyester Ripstop, 85 g/m<sup>2</sup> coated with thermalinsulated, aluminised polyurethane, and waterproof to 3.000 mm. Water repellent, with FR treatment | Inside in waterrepellent and breathable 70D Polyester Ripstop, 55 g/m<sup>2</sup>, with FR treatment | Floor in 100% Recycled 70D, 95 g/m<sup>2</sup> polyester, coated with thermalinsulated polyurethane, waterproof to 8.000 mm. Water repellent, with FR treatment | Front window in clear TPU | Taped seams in flysheet and floor | Three layer construction to reinforce the floor corners

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 2 shockcorded duraluminium poles with double

crossover structure | Inner tent hung from poles with pole guide sleeves | "Y-Peg" aluminium pegs

**Entrance and ventilation:** Front vestibule | Door with mosquito net exterior that opens out fully and folds into a special pocket | Ventilation sleeves

**Storage:** Internal storage pockets and gear loops

**Accessories:** Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings | Adjustable fly sheet distance from the base using aluminium buckles, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Reflective multi-point guy line system to prevent the breakage or deformation of poles in strong winds | Internal lamp hook | Stuff sack | Repair kit included | Instruction video activated with QR code

## Namika 2

99064 NAAFR

\* fly sheet, inner tent and poles only

**2-Person, 4-season tent with minimum weight and compact dimensions.**

**Easy to set up, thanks to the continued external sleeves, closed on one end for easy set-up, even in case of harsh weather conditions, without getting the inner tent wet.**

**Structure:** Dome

**Materials:** Fly-sheet in 100% Recycled 70D Polyester Ripstop, 85 g/m<sup>2</sup>, coated with aluminised, heat-insulating polyurethane, waterproof to 3000 mm, with FR treatment | Inner tent in 70D Polyester Ripstop, 55 g/m<sup>2</sup>, water-repellent and breathable, with FR treatment | Floor in 100% Recycled 70D Polyester, 95 g/m<sup>2</sup>, coated with heat-insulating polyurethane, waterproof to 8,000 mm, with FR treatment | Front window in clear TPU | Taped seams in fly-sheet and floor | Three-layer construction to reinforce the floor corners.

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 shock-corded duraluminium poles in different colours for easier set up | External poles | Inner tent hung from fly-sheet with tapes, loops and toggles | "Y-Peg" aluminium pegs

**Entrance and ventilation:** Front vestibule | Door with exterior mosquito net that opens out fully and folds into a special pocket | Ventilation sleeves with stormproof system.

**Storage:** Internal storage pockets and gear loops

**Accessories:** Tape loops in floor corners to secure the tent, if set up on snow, with ice-axes, skis or other dead weights | Reflective storm guy-lines | Lamp hook | Stuff sack | Repair kit included | Instruction video activated with QR code.

## Manaslu 2

99070

\* fly sheet, inner tent and poles only

**Manaslu 2 is the 4 season, 2 person tent for all those seeking space, minimum weight, easy set up and top performance in terms of reliability, thanks to the duraluminium structure with radial joints.**

**Structure:** Tunnel

**Materials:** Fly sheet in 100% Recycled Polyester Ripstop 70D, 85 g/m<sup>2</sup>, polyurethane coating, aluminised and thermal insulating, waterproof to 3.000 mm, water repellent with FR treatment | Inner tent in Polyester Ripstop 70D, 55 g/m<sup>2</sup>, water repellent and breathable with FR treatment | Floor in 100% Recycled Polyester 70D, 95 g/m<sup>2</sup>, thermal insulating polyurethane coating, waterproof to 8.000 mm, water repellent with FR treatment | Front window in transparent TPU | Taped seams in flysheet and floor | Three layer construction to reinforce the floor corners

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | Loadbearing structure with shockcorded duraluminium poles and radial joints | Inner tent hung from poles with hooks and sleeves | "Y-Peg" aluminium pegs

**Entrance and ventilation:** Front vestibule | Door with mosquito net exterior that opens out fully and folds into a special pocket | Ventilation sleeves | Liftable snow flap on base perimeter of the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

**Storage:** Internal storage pockets and gear loops

**Accessories:** Tape adjustment for the fly sheet, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Reflective storm guy lines | Lamp hook | Stuff sack | Repair kit | Instruction video activated with QR code

## Svalbard 3.0

99056 LAAFR

\* fly sheet, inner tent and poles only

**Svalbard 3.0 is the 4 season tent that best embodies Ferrino's spirit of adventure; a trustworthy companion in terms of reliability and versatility, and excellent in all 4 seasons in the mountains or anywhere else that trekkers and climbers decide to take it.**

**Structure:** Double cross

**Materials:** Fly sheet in 100% Recycled Polyester Ripstop 70D, 85 g/m<sup>2</sup>, coated with aluminised and thermal insulating polyurethane, waterproof to 3.000 mm., water repellent with FR treatment | Inner tent in water repellent and breathable Polyester Ripstop 70D, 55 g/ m<sup>2</sup> with FR treatment | Floor in Polyester Oxford 210D, 130 g/ m<sup>2</sup>, coated with thermal insulating polyurethane, waterproof to 8.000 mm., water repellent with FR treatment | Taped seams in fly sheet and floor to guarantee waterproofing | Three layer construction to reinforce the floor corners

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong and elastic | 3 shockcorded duraluminium poles | Different coloured poles for easier set up | Inner tent hung from poles with

pole guide sleeves| "Y-Peg" aluminium pegs

**Entrance and ventilation:** Vestibules to protect the two entrances, front and back with extra room for bulky equipment | Fully opening doors with mosquito net exterior, which fold into a special pocket | Stormproof ventilation sleeves | Liftable snow flap on base perimeter of the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

**Storage:** Internal storage pockets

**Accessories:** Tape loops on floor corners to secure the tent, if set up on snow, using ice axes, skis or other moorings. | Adjustable fly sheet distance from the base for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Reflective multipoint guy line system to prevent the breakage or deformation of poles in strong winds | Internal lamp hook | Stuff sack for tent included | Repair kit included | Instruction video activated with QR code

## Lhotse 4

99069 LAAFR

\* fly sheet, inner tent and poles only

**Lhotse 4 is the 4 person tent that is ideal for base camp use. A shelter that offers maximum comfort and room, together with robustness, ventilation and heat insulation.**

**Structure:** Dome

**Materials:** Fly sheet in 100 % Recycled Polyester Ripstop 70D, 85 g/m<sup>2</sup>, polyurethane coating, aluminised and thermal insulating, waterproof to 3.000 mm, water repellent with FR treatment | Inner tent in Polyester Ripstop 70D, 55 g/m<sup>2</sup>, water repellent and breathable with FR treatment | Floor in 100 % Recycled Polyester 70D, 95 g/m<sup>2</sup>, thermal insulating polyurethane coating, waterproof to 8.000 mm, water repellent with FR treatment | Transparent TPU windows | Taped seams in fly sheet and floor to guarantee waterproofing | Threelayer construction to reinforce the floor corners

**Poles:** Poles in 7001 T6 tempered aluminium alloy: light, strong

and elastic | 3 poles in shockcorded duraluminium in different colours for easier set up | Inner tent hung from poles with hooks and sleeves for easy set up | "Y-Peg" aluminium pegs

**Entrance and ventilation:** Two vestibules | Fully opening doors with mosquito net exterior, which fold into a special pocket | Ventilation sleeves | Lifiable snow flap on base perimeter of the tent for excellent ventilation (when rolled up) or tent protection in case of bad weather (if unrolled)

**Storage:** Internal storage pockets | Gear loops | Removable storage on the inside ridge of the inner tent

**Accessories:** Multipoint guy line system to prevent the breakage or deformation of poles in strong winds | Tape adjustment for the fly sheet base, for excellent tensioning and to provide a larger or smaller air passage, based on climate and weather conditions | Lamp hook | Stuff sack | Repair kit | Instruction video activated with QR code

# Sleeping bags

## HighLab

### HL Mystic

---

HL Mystic is the microfibre sleeping bag with top-of-the-range heat insulation performance and light weight. Ideal for mountaineering activities.

### HL Revolution

---

HL Revolution 1200 is the ideal sleeping bag for those wishing to rest during expeditions under extreme weather conditions, since it offers thermal insulation up to  $-47^{\circ}\text{C}$  and comfort close to  $-23^{\circ}\text{C}$  (man).

## We use the EN ISO 23537-1:2022

All of our sleeping bags are tested to the European EN13537 standard and the subsequent EN ISO 23537-1:2022, by an independent textile research body. A special mannequin, fitted with sensors, is

inserted into the sleeping bag and identifies the optimum user temperature according to the temperature of the environment.

WARNING: In the risk range, a strong sensation of cold must be expected.  
There is a risk of health damage by hypothermia.

## Definition of comfort and extreme values

### Comfort temperature

This is the temperature level (referred to a standard woman) at which it is possible to sleep all night in a relaxed position.

### Lower comfort limit

Is the minimum temperature (referred to a standard adult man at which it is possible to sleep in a curled up position, without waking, for eight hours.

### Extreme temperature

This is the minimum temperature at which the sleeping bag protects the user (standard adult woman) against hypothermia. It allows six hours of uncomfortable sleep without the internal temperature dropping to a dangerous level.

When you choose your sleeping bag, we suggest that you consider comfort and intermediate temperatures, according to your level of physical fitness. When we feel hot or cold, it is caused by our body producing greater or smaller amounts of heat compared to what we are losing to the surrounding environment.

## Features

---

### Offset Seams

---

To prevent heat dispersion, the seams between the inner and outer layers are never communicating.

### Shingle Construction

---

"Shingle" tile construction Better heat insulation in the same size.

## Filling

---

Ferrino & C. spa is RDS certified  
 Certified by ICEA  
 ICEA-TX- 609  
 "Only the products which carry  
 the RDS label and claim are certified"

### Responsible Down Standard (RDS)

---

The Responsible Down Standard (RDS) (independently) certifies down and feathers against animal welfare requirements and tracks it from farm to final product.

**Tracking:** Every stage in the supply chain must be managed in such a way that certified products cannot be confused and/or replaced with others. It allows the end customer to view the names of certified companies on the R.D.S. website. Ferrino will also be on this list.

### Extradown

---

The Extradown filling consists of goose feathers and down (with maximum heat power).

### Nixwax® treatment

---

Traditional untreated down is not water-resistant and absorbs water, loses its softness, and its insulating capacity.

The down with Nikwax DWR treatment resists moisture while maintaining the down's insulating properties and breathability.

- Absorbs 90% less water and dries 3 times faster than untreated conventional down.
- Extends the life of the down
- It is safe for you and the environment as it does not contain PFCs or other harmful chemicals.

### Microfiber

---

A combination of 2D and 3D micro fibres to offer an excellent softness that is comparable only to down. Excellent resilience together with thermal efficiency make this one of the most cutting-edge manmade fibres. It also maintains its thermal capacity when damp or compressed.

# Fabrics

## 20D 380T Nylon

For those who want the utmost comfort and at the same time, extreme resistance. Particularly suited as a liner fabric for top-performance sleeping bags.

## Nylon 30D 184T mini ripstop

The hand and light weight of the fabric bring out the best qualities of the products on which they are used! Its fibre-proof characteristics guarantee the life-long durability of your sleeping bag.

## Nylon 10D Ripstop recycled

An ultra-lightweight recycled downproof fabric that combines excellent resistance with extraordinary breathability. Particularly suitable for the outer and inner fabrics of the sleeping bag.

## Down Filling

### Features

---

#### Offset Seams

---

To prevent heat dispersion, the seams between the inner and outer layers are never communicating.

### Filling

---

Ferrino & C. spa is RDS certified  
 Certified by ICEA  
 ICEA-TX- 609  
 "Only the products which carry  
 the RDS label and claim are certified"

#### Responsible Down Standard (RDS)

---

The Responsible Down Standard (RDS) (independently) certifies down and feathers against animal welfare requirements and tracks it from farm to final product.

**Tracking:** Every stage in the supply chain must be managed in such a way that certified products cannot be confused and/or replaced with others. It allows the end customer to view the names of certified companies on the R.D.S. website. Ferrino will also be on this list.

#### Down

---

The duck down to feather ratio, expressed in percentage terms, is the identity card of a down sleeping bag. The CUI unit of measurement expresses the loft height in inches of every 30 g of feathers. A higher value means a higher degree of heat insulation.

### Fabric

---

#### 400 T 20 D Polyester

---

Recycled featherproof fabric with excellent breathability, resistance and lightness. Particularly recommended for use as sleeping bag outer shell and liner fabric.

#### Nylon 20D Ripstop / 400T 20D polyester

---

Recycled featherproof fabrics with excellent breathability, resistance and light weight. Particularly recommended for sleeping bag outer shells and liners.

#### Recycled Fabric

---

**You are buying a product made from 100% recycled fabric.**

## Lightec Duvet

**A range of down sleeping bags for the more demanding user. Perfect for those looking for maximum performance, extremely limited weight, excellent insulation and compact dimensions.**

**Shell:** 100% Recycled 400T 20D Polyester Rispstop

**Liner:** 100% Recycled 400T 20D Polyester

**Filling:** **Lightec 1400:** 1000 g down 80/20 550 cuin | **Lightec 1200:** 700 g down 80/20 550 cuin | **Lightec 1000:** 500 g down 80/20 550 cuin | **Lightec 800:** 350 g down 80/20 550 cuin | **Lightec 500:** 250 g down 80/20 550 cuin

**Features:** Minimum heat loss, thanks to the staggered seams | Easier opening with the "One Touch" system | 3D shape in the foot area for improved comfort (except for Art. 86699 500 Duvet) | "2-way" zipper on the sides and zipper in the foot area | Cold protection hood | Zip baffle | Outside storage pocket | Stuff sack included

**Lightec Duvet 500:** Extremely light and compact. Can be used as a liner together with a warmer sleeping bag for improved cold protection. Our tests show that it increases heat insulation comfort values by 7-8°C.

**Features:** Easy "one touch" opening system | Outside storage pocket | Stuff sack

# Sleeping bags

## Synthetic Filling

### Nightec

The ideal sleeping bags for 4-season use. The Micro fibre manmade filling and Dual-zip system guarantees maximum thermal efficiency.

## Features

### Offset Seams

To prevent heat dispersion, the seams between the inner and outer layers are never communicating.

## Filling

### Microfiber

A combination of 2D and 3D micro fibres to offer an excellent softness that is comparable only to down. Excellent resilience together with thermal efficiency make this one of the most cutting-edge manmade fibres. It also maintains its thermal capacity when damp or compressed.

## Fabric

### 190T Polyester

Strong polyester fibre that provides excellent resistance to UV rays.

### Nylon 310T 40D Diamond Ristop

Particularly suited for the shell and liner of the sleeping bag, due to its excellent breathability and resistance combined with the maximum in terms of light weight.

## Full Safe 30 E2 NA Black

---

### Certified

---

According to the EN16716:2017

### Inflates in 3 seconds

---

The E2 system uses a radial compressor similar to a car turbo compressor and ensures quick inflation.

### Performance guaranteed from -30°C to +50° C:

---

The supercapacitor stores electrostatic energy and ensures there are no performance changes with temperatures ranging between -30°C and +50° C.

### LCD and LED Display

---

To check the charge level of the supercapacitors and the energy level of the AA batteries. LED lights visible from outside the bag mark the status and the charge level on the E2 system.

### Deflation knob

---

The airbag deflates via the orange button on the side of the E2 and is accessible from the outside of the backpack. Once the airbag is deflated, the safety cover automatically closes to lock the deflation button.

### No more cartridges refills

---

The airbag is inflated by the electric system and does not require charge cartridges

### Carry it with you on a plane without restrictions

---

It is a passive electrical device like a camera, so it can be transported on a plane without restrictions

### Airbag Volume

---

150 l

### Alpride E2 Airbag

---

100% electric system

### Easy charge

---

E2 supercapacitors can be recharged using a USB-C port (cable included) or two high-quality AA alkaline or lithium batteries (not included).

### Auto test

---

Every time the E2 system is switched on, it automatically tests the motor, supercapacitors, and electronics to ensure their proper operation.

### Overpressure valve

---

The pressure limiting valve is activated 3 minutes after inflation ends, ensuring a longer life of the equipment, inflation after inflation.

### Test it first, for free, as many times as you want

---

Free inflation tests: thanks to electric charging, you can test the Airbag as many times as you want so you can ski with peace of mind.

## Full Safe 30 E2 NA Black

**75608QCC**

**Freeride and skitouring backpack, equipped with 2 safety devices in case of avalanche: Alpride E2 Airbag System, fully electric, powerful, and reliable even at low temperature and RECCO Reflector.**

**Fabrics:** 305 P Ripstop HP Cordura®

**Back:** Thermoformed back for a perfect fit while skiing | Padded and ergonomic shoulder straps and waist belt.

**Pockets:** Front pocket with gear loops designed for carrying technical equipment (ice axe, crampons, carabiners) and self-rescue gear (shovel and probe) | Internal pocket to keep valuables safe | On waist strap | Padded upper pocket for mask/goggles.

**Accessories:** Alpride E2 Airbag | RECCO reflector to increase the chance of being found in case of an accident | Two ice axe holders | Reinforced front ski holder | Additional front straps for carrying snowshoes/skis/snowboard | Side compression straps | Chest strap with whistle | Two ice axe holders | Gear loops on waist strap and front pocket | "Helmet Holder" compatible | Helmet loops | SOS instructions | Certified according to EN16716:2017.

## Safety System

Alongside obligatory safety equipment (shovel, probe, arva), our systems increase the probability of survival in case of avalanche.

### Airbag

The Airbag prevents injury and helps you to float on the snow if hit by an avalanche.

### Recco Reflector

The Recco reflector increases the possibility of being found in case of accident

## Airbag System

alpride  
airbag system

alpride  
airbag system 2.0

### Airbag System

The round shape of the Airbag allows maximum protection in case of impact, protecting from upper body and head injuries, as well as excellent floating action to avoid deep burial.

### Alpride / Alpride 2.0

When the handle is pulled, this inflates the Airbag. Gas is released from the cartridge to inflate the Airbag in 3 seconds via the internal valve. Airbag volume 150 l

**Safe:** TUV\_certified Alpride technology Resistant: Temperature of use: -30 °C / +50 °C | **Fast:** Airbag inflation time: 3 seconds | **Lightweight:** One of the most lightest system currently available on the market | **Alpride ABS:** 1200 g (canisters 440 g and airbag system 760 g) | **Alpride ABS 2.0:** 1100 g (canisters 440 g and airbag system 660 g) | **Practical:** Suitable for air transport in the hold, on a backpack with integrated airbag and fitted with gas cartridge Compliant with IATA (International Air Transport Association).

### Alpride set Cartridges

440 kg

75599

Each airbag is equipped with two cartridges

Cartridge filled with argon: this gas guarantees excellent inflation speed It contains 15 litres of gas foam. Internal pressure 180 bars. Cartridge filled with CO2: this

gas guarantees excellent airbag inflation and volume Contains 30 litres of gas foam. Internal pressure 70 bars. This is the same cartridge used for motorbike airbags. The mix of these two gases guarantees excellent airbag inflation speed and volume no expiry.

**Accessories:** Airbag: Alpride 1.0 is an ultra-light device with super-fast inflation | The airbag canisters do not expire, are 100% leak free, are approved by IATA (International Air Transport Association), and contain a mix of gases to provide quick inflation (CO2) and expansion, and air bag volume (Argon) | RECCO reflector to boost chances of being traced in case of accident | Removable padded, ergonomic waist belt in breathable mesh fabric | Chest strap with integrated whistle | Thigh harness suitable for left- or right-hand use | Side and front compression system | Front ski holders | 1 ice axe holder | Aluminium safety buckle on waist belt, shoulder straps and chest strap | Gear loops on waist belt | Compatible with the H2 bag hydration control system | SOS instructions | Certified according to EN 89/686/ECC standards

# High Lab

## Ultimate 35+5

Ultimate 35+5 is ideal mountaineering backpack. 100% waterproof thanks to HDry® system. (10.000 mm water column, even on the seams).

## Instinct 25

Mountaineering backpack made in Bio-Based Dyneema® Composite Fabric, Cordura® Nylon with SuperFabric® reinforcements to guarantee an excellent combination of light weight and strength.

## Instinct 40+5

Mountaineering backpack in Bio-Based Dyneema® Composite Fabric, Cordura® Nylon with SuperFabric® reinforcements to guarantee an excellent combination of light weight and resistance.

# Back Systems

## Breathable Back

Ultra-breathable back, shoulder straps or waist belt using open-cell padding with super-breathable mesh fabric.

## Hollow Back System

Ultra-breathable back, shoulder straps and waist belt with a combination of pre-formed padding with vent channels and super-breathable mesh fabric.

## Air Convector Tech

A super-breathable ergonomic back in mesh fabric. The double-density shaped padding ensures excellent breathability. The back panel is supported by a removable polyethylene panel with internal support for improved load distribution and carrying stability.

## Double Ergo Adjustment

An extremely practical and comfortable adjustment system using a shoulder strap slide that runs along a self-modelling double framework in aluminium for better weight distribution in the waist area.

## Dry Net System

Breathability is guaranteed by mesh fabric, while weight distribution and carrying stability are optimised by a framework.

## Fabrics

 **With Dyneema®**

**CORDURA®**

 **SuperFabric®**

**HDry®**

**YKK**

### Twill 500 x 400D

Fabric made in polyester with excellent strength and resistance.

### Dyneema®

Ultra-light fabric in high-tenacity DSM Dyneema® fibre.

### Bio-Based Dyneema® Composit

Bio-Based Dyneema® Composite is a patented, ultra-lightweight fabric made of flexible non-woven composite laminates which are reinforced with Dyneema® fibers. The variant of DCF selected by Ferrino is a 2-layer laminate material using 1.43 oz/yd 2 DCF and a 50D polyester plain-weave fabric: high tear and tensile strength and an unmatched strength/weight ratio.

### Double Diamond Cordura®

Exceptionally robust fabric made with high-tenacity 210D polyamide fibre.

### Supertex®

An extremely hardwearing fabric that is ideal for backpacks that have to withstand repeated stresses over time.

### Superfabric®

This fast-drying fabric also offers exceptional performance in terms of abrasion and shear resistance.

### Reinforced Laminated Fabric

Rip- and scratchproof chlorosulphonated polyethylene.

### Hdry®

The HDRY® waterproofing technology is based on a patented lamination technique, where, thanks to the combined action of pressure and temperature, the waterproof membrane is heat welded inside the backpack.

With the HDRY® system, the membrane is prepared in a 3D shape that, by adapting to the shape of the backpack, adheres to the inner surface, perfectly sealing the seams and any other point where water can enter. This process makes the backpack completely waterproof (10.000 mm water column, even at the seams), and increases the resistance of fabrics guaranteeing improved durability.

### Tripleseam

Fabrics are joined together using a double overlapping seam, protected by nylon edging, which is in turn secured by a third seam.

### YKK Zips

## Partnership

Ferrino has been actively working alongside the CNSAS since 1998 and with the ENSA since 2001, designing and testing mountaineering products. These partnerships with mountain professionals mean guaranteed top-level

technical quality for Ferrino's materials, which are really put to the test during daily use and also in more extreme situations.

### CNSAS

### Mountain Custodians

The CNSAS (National Alpine and Cave Rescue Corps) was founded on 12 December 1954, but its roots go back all the way to the spirit of solidarity that is so natural to people from the mountains. Time in the mountains and the birth of so many sports and extreme activities have meant that alpine rescue has had to develop, becoming the all-round, organised body that is the CNSAS. A capillary network covers the whole country and is comprised of some 7,000 operators, forming a team of top-level professionals who have been working actively with Ferrino in the quest for increasingly innovative technical solutions since 1998.

### ENSA

### University of Mountaineering

The ENSA (École Nationale de Ski et d'Alpinisme) was founded in France in 1946. It is a public body, under the patronage of the Ministry for Youth and Sport. The school is internationally and traditionally recognised for training mountain sports professionals and for its skiing and mountaineering teaching programmes.

# Mountaineering

## Rutor 30

Backpack designed for ski mountaineering and climbing: ideal for “fast and light” outings.

## OSA 32

The OSA 32 is a backpack for freeriders and ski mountaineers who set no technical or stylistic limits for themselves. This backpack is all about maximum ergonomics and functionality, meeting every need in the snow.

## Summit 32+5

Summit 32+5 is the ideal backpack for mountaineers seeking light weight and versatility. Thanks to the removable elements, it is possible to modulate weight and volume to adapt the backpack to different activities. The practical front opening and top roll-up closure guarantee quick, easy access to gear.

## Back Systems

### Breathable Back

Ultra-breathable back, shoulder straps or waist belt using open-cell padding with super-breathable mesh fabric.

### Breathable "O" System

Ultra-breathable shoulder straps and waist belt with pre-formed padding with "O"-shaped vent channels and super-breathable mesh fabric.

### Hollow Back System

Ultra-breathable back, shoulder straps and waist belt with a combination of pre-formed padding with vent channels and super-breathable mesh fabric.

### Air Convector Tech

A super-breathable ergonomic back in mesh fabric. The double-density shaped padding ensures excellent breathability. The back panel is supported by a removable polyethylene panel with internal support for improved load distribution and carrying stability.

ERGONOMIC CONTOURS  
DIFFERENTIATED PAD-  
DING ON WAIST BELT

### Woman Special Features

We pay a great deal of attention to the different needs of outdoor enthusiasts and that is why we have created our WOMAN line, a range that includes backpacks and sleeping bags especially designed to meet the specific requirements of women users, guaranteeing high performance and maximum comfort.

## Fabrics

---

### **CORDURA**

#### **Cordura 500D<sup>®</sup>**

A fabric made to last with excellent tearing resistance. A guarantee of a backpack with great strength.

## Polartec Alpha

Polartec® **Alpha**® active insulation continuously releases excess body heat before it builds to cause saturation and discomfort. This patented, adaptive knit quality is made possible through Alpha's lofted fibers connected to a solid mesh core. And since Polartec® Alpha® design is inherently hydrophobic, it resists all moisture and dries incredibly fast.

**Advantages:** Regulates warmth | Advanced breathability | Fast drying | Compressible | Lightweight | Highly durable

## Alpha Direct

Polartec® **Alpha Direct** is an evolution of original alpha® technology that eliminates the need for a backing fabric to create an enclosed fabric package. By refining the shape and size of its lofted fibers, alpha® direct can be in direct contact with skin or other fabric layers. This new design ability increases breathable performance, expands versatile style options, and further reduces overall garment weight. Polartec® alpha® direct active insulation works by continuously releasing excess body heat before it builds to cause saturation and discomfort.

this patented, adaptive quality is made possible through alpha's unique lofted fiber structures connected to a solid mesh core. and since polartec® alpha® direct is inherently hydrophobic, it resists all moisture and dries incredibly fast.

**Advantages:** Regulates Warmth | Advanced Breathability | Fast Drying | Compressible | Lightweight | Highly Durable

## Polartec Power Air

Is a revolutionary, new knit construction that encapsulates air to retain warmth and reduce microfiber shedding. The end result is a high performance fabric with advanced thermal efficiency that sheds at least 5x less microfibers than modern synthetic fleece materials. And while all fabrics will shed fibers over time, Polartec®

Power Air™ is a step forward in reducing the environmental impact of what we make and wear.

**Features+Benefits:** Encapsulates air | Sheds at least 5x less microfibers | Efficient warmth | Highly durable | Resists pilling | Dual surface construction

## Primaloft

Ferrino has confirmed its partnership with PrimaLoft® for its products. Every quilted thermal item of apparel has

been made with the best type of PrimaLoft® technology to guarantee the best possible thermal performance.

## Primaloft Gold Insulation Luxe

PrimaLoft® Gold Insulation Luxe seems like down, feels like down and has the same characteristics as down, but with one brilliant exception: it performs even better in cold, wet weather, without losing any thermal efficiency when wet.

**Advantages:** Warmth equivalent to about 500 filling

power of down. | Thanks to its construction, similar to a down-filled item, this can weigh up to 20% less than a similar item with a different synthetic filling and classic construction. | A guarantee of thermal stability and comfort with cold-weather performance thanks to its waterproof qualities. | Style and down-like sensitivity for excellent compression.

## Primaloft Silver Insulation

PrimaLoft® Silver Insulation is a go-to for technical performance. It is engineered for a full spectrum of benefits – millions of air pockets trap body heat in extreme conditions and lack of bulk means great freedom of movement for the activity. The PrimaLoft® proprietary treatment ensures excellent performance as the insula-

tion maintains its warmth properties even in wet conditions. On top of all that, PrimaLoft® Silver Insulation is designed for durability in a lightweight design for active applications, packability, breathability, and softness. No need to compromise your performance.

## Primaloft Insulation Thermoplume

Small, silky fibre feathers mixed to imitate the heat, lightness, softness and compressibility of natural goose down. This special mix of fibres, patented by PrimaLoft®

has all you need from a practical filling that can give you insulating loft, protection against rain and compressibility.

## Pontetorto

The made in Italy fabric by Pontetorto is made from Perpetual recycled polyester yarns and ECONYL® a nylon fibre that is 100% regenerated from fishing nets and other nylon waste.

### ECONYL®

**ECONYL®:** Is a nylon fibre that is 100% regenerated from fishing nets and other nylon waste.

**Perpetual** has developed a unique, developmental technology to convert plastic bottles into high quality filament yarns.

## Jorasses

**55311 M01** Size: XS - S - M - L - XL - XXL

**Primaloft® Gold padded glove, laminated using innovative HDry® technology: top-level waterproof quality with breathability and insulation to deal with any type of mountaineering activity in extreme cold conditions.**

Main characteristics: Outer Shell: Nylon Dobby | Membrane: HDry® | Padding: Primaloft gold® | Palm in leather | Cuff fast-

ning with rapid "One Touch" elastic adjustment | Nose /sweat wiper and glasses cleaner on thumb | Adjustable and removable safety cord | Loop for snap hook

Use: Expedition | Mountaineering | Dry tooling | Ice climbing | Mixed Routes | Ski mountaineering | Alpine skiing

## HDry

Thanks to the HDry technology, these gloves offers the highest level of waterproofness, breathability and thermal insulation.

The waterproof and breathable HDry membrane is steadily laminated to the glove's shell back side, sealing the material and all seams, leaving no gaps where water can penetrate and stagnate. Wind is blocked on the glove's outer surface and a large volume of dry air keeps your hand warm and comfortable.

The ultra-thin waterproof HDry membrane and unique lamination process provides dexterity and a precise fit, limiting the need to take your gloves off.

155 g  
SIZE M

## Chimney

55312M01

Size: XS - S - M - L - XL - XXL

**Padded, waterproof, and breathable glove for winter mountain activities. The pre-formed thumb and close-fitting cuff provide an excellent fit and boost sensitivity.**

Main characteristics: Outer Shell: Nylon Dobby | Membrane: Dintex | Padding: Thermolite® | Palm in Rubber tech reinforced fabrics with stretch inserts | Elastic and Velcro fastening on cuff | Nose/sweat wiper and glasses cleaner on thumb | Adjustable and removable safety cord

Use: Mountaineering | Ice climbing | Mixed Routes | Ski mountaineering | Alpine skiing

Waterproof

155 g  
SIZE M

## React

55310 G01

Size: XS - S - M - L - XL - XXL

**Padded, waterproof glove with a close fit for maximum sensitivity when using equipment: the ideal choice for winter sports in the mountains. Hands are always warm and dry, thanks to Thermolite® filling for a high degree of thermal comfort, and to Dintex® waterproof and breathable membrane.**

Main features: Shell: Nylon Dobby | Membrane: Dintex | Filling: Thermolite® | Palm: Leather | Adjustable cuff | Reinforcements on die-cast EVA knuckles to protect against impact | Conductive material inserts on index finger and thumb for the use of touchscreen devices.

Use: Mountaineering | dry tooling | ice climbing | mixed routes | ski mountaineering | alpine skiing.

90 g  
SIZE M

## Crest

55320 G01

Size: XS - S - M - L - XL - XXL

**Warm and light glove extremely versatile, suitable for different types of activities. Maximum protection guaranteed by the outer shell in windproof and water-repellent softshell.**

Main features: Shell: wind breaker soft shell | Filling: microfleece | Palm: micro pu with padded stretch inserts for optimal fit

and protection. | Cuff: adjustable | Conductive material inserts on index finger and thumb for the use of touchscreen devices. | Wind breaker soft shell fabric: designed to offer optimal wind protection and excellent breathability.

Use: ski mountaineering | cross country skiing, snowshoeing | dry tooling | ice climbing | mixed routes | summer mountaineering.

145 g  
SIZE M

## Wanaka

55313 M01

Size: XS - S - M - L - XL - XXL

**Padded, waterproof and breathable mitt for winter mountain activities. The preformed thumb and close-fitting cuff provide an excellent fit and boost sensitivity.**

Main characteristics: Outer Shell: Nylon Dobby | Membrane: Dintex | Padding: Thermolite® | Palm in Rubber tech reinforced fabric with stretch inserts | Elastic and Velcro fastening on cuff | Nose/sweat wiper and glasses cleaner on thumb | Adjustable and removable safety cord

Use: Mountaineering | Ice climbing | Mixed Routes | Ski mountaineering | Alpine skiing

80 g  
SIZE M

## Rasac

55345 H01

Size: XS - S - M - L - XL - XXL

**Warm, lightweight and compact mitten, thanks to the filling in Primaloft Gold. The opening on the palm frees the fingers for simple operations without having to remove the glove.**

**Main Features:** Reinforced palm and back in 20D Nylon Ripstop. | Nose or eyewear cleaner on the thumb.

**Use:** Mountaineering | ski mountaineering | freeride | and snowshoes

60 g  
SIZE M

## Meta

55330 G01

Size: XS - S - M - L - XL - XXL

**Windproof and water-repellent softshell glove suitable for different types of activities.**

**Main features:** Shell: wind breaker soft shell | Palm: micro pu reinforced with silicone inserts guarantees the secure grip of poles and ice axes | Conductive material inserts on index finger and thumb for the use of touchscreen devices. | Wind breaker soft shell fabric: designed to offer optimal wind protection and excellent breathability.

**Use:** Ski mountaineering | cross country skiing | snowshoeing | summer mountaineering | running.

45 g

## Grip

55340 G01

Size: XS - S - M - L - XL - XXL

**Warm and breathable glove suitable for aerobic activities in cold climates, can be used alone or as a liner. Its stretch fabric and cutting-edge seam system guarantee a perfect fit and maximum comfort.**

**Main features:** Shell: Grid-pattern microfleece. | Palm: reinforced with anti-slip texture to optimise grip | Conductive material inserts on index finger and thumb for the use of touchscreen devices. | Grid-pattern microfleece: fabric designed to retain heat and optimal heat distribution to the hand.

**Use:** Running | summer mountaineering | ski mountaineering, cross country skiing | snowshoeing.

40 g

## Jib

55350 G01

Size: XS - S - M - L - XL - XXL

**Warm and breathable glove suitable for aerobic activities in cold climates, can be used alone or as a liner. The stretch microfleece and state-of-the-art stitch system guarantee a perfect fit and maximum comfort.**

**Main features:** Shell: microfleece | Conductive inserts on index finger and thumb for the use of touchscreen devices.

**Use:** Running | summer mountaineering | ski mountaineering, cross country skiing | snowshoeing.

90 g  
SIZE 8,5

## Alesund

**55214 H06**

Size: 6,5 - 7 - 7,5 - 8 - 8,5 - 9 - 9,5

**Warm 2-layer woollen hiking glove: ideal for harsher winter climates.**

**Main features:** Heat insulation performance is not affected if the outside of the glove gets wet. | Fine ribbed cuffs for better cold protection. | Made in Austria

**Use:** Winter hiking | ski mountaineering

160 g  
SIZE 8,5

## Bergen

**55215 H06**

Size: 6,5 - 7 - 7,5 - 8 - 8,5 - 9 - 9,5

**Warm 4-layer woollen mitten with exceptional insulation against extreme cold conditions.**

**Main features:** The type of wool used maintains its heat capacity, even when wet. | Long, fine ribbed cuffs for better cold protection.

**Use:** Winter hiking | ski mountaineering

# Snow Shoes

## Pinter Castor Special

Compact-sized model to guarantee excellent comfort while walking and in any case, good sliding over fresh snow.

## Felik

The toothed double side profile on the bottom is a guarantee of perfect grip even on steep slopes or climbs. When walking over deep snow, the raised design of the front wedge offers easier gliding over the snow surface.

## Lys Castor Special

With an angled side profile, you can have guaranteed total grip even on steep slopes or climbs, while on fresh snow, the special angle increases the supporting surface to guarantee excellent sliding.

## Features

---

# MADE IN ITALY

### Made in Italy

---

Every snowshoe has been devised and developed at the Turin headquarters. The basic concepts behind products are:

- Designs that allow progress to be as “natural” as possible
- Safety during use
- Hardwearing durability

The first development stage involves 3D prototyping by our team of designers. Every technical solution is then tried out and validated by our testers in the field. The whole production process (from the injection moulding of the plastic through to final assembly), is carried out in Italy. This is an essential aspect because it gives us complete control over product quality. \*except Trient model

### Materials

---

The materials used to make our snowshoes have been carefully selected to guarantee the best possible strength and light weight, while leaving characteristics unchanged, even at low temperatures (-20 °C).

The bindings are in HD polypropylene, while the mounts are in PA66 polyamide. All snowshoe parts have the highest possible level of UV resistance.

### Use

---

Based on its technical features, each snowshoe has its own specific intended use, which we can sum up as 3 types:

#### **Approach**

For those approaching snowshoeing for the first time and ideal for terrains where the difficulty and slope are not too harsh.

#### **Excursion**

For the medium-difficulty user who needs a shoe that provides an excellent compromise between weight, size and slide.

#### **Expert**

For the experienced user on harder terrain, who needs a product with excellent sliding qualities and a wide range of accessories.

MAX 120 kg

## Floating

This is a weight range that identifies optimum snowshoe capacity. To date there is no test to define this weight unequivocally. The Ferrino team has carried out slide tests in the field to give users.

The best indications possible.

Slide is directly linked to shoe size and this is why shoes are divided into 3 categories:

### King Size

For those needing maximum slide performance

### Medium Size

The perfect combination of size and slide

### Compact Size

For those needing a super-compact product

## Bindings

### Castor Special

Castor Special is a patented binding system with comfy foot positioning and ultra-fast lock to secure the foot perfectly via lever during use. Size is adjusted by releasing the heel and moving it to fit the foot.

### Castor

Castor is a patented binding system with comfy foot positioning and easy locking with adjustment straps and buckles. Size is adjusted by releasing the heel and moving it to fit the foot.

## Heel Lift

When the slope increases on ascents, then the heel lift can be used. This is a system that relieves some of the

stress from the leg muscles. Baldas snowshoes have two systems:

### Q-UP System

Q-UP system: to engage and disengage the heel lift by simply pushing it with your pole, eliminating the need to bend down.

### TD System

TD system: traditional heel lift, manually-controlled system.

## Crampons System

Essential for safety, is guaranteeing that the snowshoe has an efficient crampon system for hard snow/icy con-

ditions. All of our crampons are in stainless steel.

### 3 Prong Cleat

3-prong cleat on the front of the binding.

### Crampons

Crampons on the bottom of the snowshoe. The number will vary according to the style.

### Toothed side profile

To guarantee excellent side grip on steep and counter-slopes.

## Mustang

Mustang is a technical, light, and versatile pole for winter trekking, snowshoeing, or ski mountaineering.

## Extreme

At an external temperature of 5°C, an internal temperature of 50 °C is maintained for 16 h for mod. 0,35 l, 0,5 l; 60°C for mod. 0,75 lt and 65°C for mod. 1 lt.

## Dufour

Mountaineering gaiter with anatomical fit

## Use

Winter

Hiking

Trail  
Running

Nordic  
Walking

Fast  
Hiking

## Measures

### Pole Extension

The pole, which is divided into 2 or 3 telescopic sections, can be adjusted to optimum height within the range of the extension piece.

## Features

### Lock & Go

Quick and effective locking using an outer lever mechanism to adjust pole length, even while wearing gloves.

According to the different models, each pole has a snow roller, roller or silent tip

### Nordic Walking Fast Adjustment System

Rapid hand strap release system to free hands immediately in a single movement.

The end of the tip is extended and guarantees maximum grip on all types of terrain, as well as being excellent in releasing heel lifts for ski mountaineering or next-generation snowshoes.

410 g  
per pair

78379

NVV

GREEN

HCU

BLACK

SPARE PART  
INCLUDED:

**Kailash is an ultra-light technical pole for a range of activities in all seasons. From trail running to trekking, for the more expert user who needs light weight and reliability, from winter treks on snowshoes, to ski mountaineering.**

**Main features:** Material of the three sections: carbon | Diameter of the three sections: 16/14/12 mm | Lock&Go lever in aluminium | Anatomic non-slip hand grip | Tungsten tip | Two baskets included: winter and trekking | Silent tip

## A Batura

WINTER

Triangular  
Shape

62 - 135 cm

600 g  
per pair

78409 HCU

SPARE PART  
INCLUDED:

**Batura is a telescopic, tough pole for different purposes: winter trekking, snowshoeing, or ski mountaineering.**

**Main features:** Section material: 7075 aluminium alloy | Section diameter: 18/16/13 mm | Structure with triangular section: for better resistance to bending | Lock&Go lever in aluminium | Anatomic non-slip hand grip | Tungsten tip | Two baskets included: winter, for snow, and multi-purpose, for trekking | Silent tip

3 triangular, telescopic sections in 7075 aluminium alloy  $\varnothing$ 18/16/13 mm | Anatomic, non-slip handgrip with extension covering a part of the first section | Tungsten tip | Aluminium lock & go lever THE TRIANGULAR SECTION of this pole gives it added flexibility compared to the traditional round section shape. This greater flexibility also means greater strength for the pole, which will be better able to withstand loads and stresses. According to laboratory tests, the flexural strength values of a pole with a triangular section and a diameter of 16/14/12 mm will be increased by 20 to 50% in the respective sections (top +20%, centre +35% and bottom +50%) compared to the same pole with a round section.

## B Mustang

WINTER

65 - 135 cm

550 g

## The Ferrino Warranty

---

Every Ferrino article is studied down to the smallest detail and made with the most suitable materials for its intended use. The strict "Ferrino Quality" controls guarantee a product free from defects in materials and packaging.

If these types of defects are found, you can use the warranty which is valid for 2 years from the time of purchase of the product.

For High Lab products, the warranty is valid for 3 years.

Please note: The warranty does not cover defects caused by improper use or due to normal wear and tear of the components following prolonged use. In the case of a product purchased from a Ferrino retailer, the purchaser must return the defective item to the point of sale where he/she made the purchase together with the receipt (condition of validity of the warranty). The retailer will inform the distributor or Ferrino directly of the claim.

Ferrino will, at its discretion, request the return of the product, replace it or repair it. If the defect turns out not to be covered by the warranty, Ferrino will propose a cost estimate including shipping costs.

In the case of a product purchased from our online shop, the item can be returned, in the event of a defect or problem, directly to the Ferrino after-sales service. To start the process, fill out the form on the page (<https://www.ferrino.it/chi-siamo/sostenibilita/riparazione-e-manutenzione.html>), our internal staff will then assess whether to repair or replace the product by examining the individual cases received.

For our customers who make purchases on online sites and who benefit from the two-year warranty, our first action is to identify the source of the purchase. Therefore, please request assistance directly from the online shop if it also has a physical shop or handles returns directly on the platform. If this is not possible, the case will be handled internally, proceeding with the return process in the workshop and maintaining direct contact with the customer to ensure a timely and satisfactory resolution.

This warranty does not limit the consumer's rights as defined by the laws in force in various countries.

## Code of Conduct for Suppliers

---

For some time now, Ferrino has required its suppliers to underwrite a commitment to operate according to principles of mutual trust and absolute respect for human rights and protection of the working environment.

The company has recently re-launched a special programme to prevent the use of any labour under the age of 15, in compliance with the International Labour Organisation Convention no. 138.

## Supplier selection

---

Ferrino carefully selects its suppliers and evaluates them on the basis of whether they meet the necessary technical, organizational, and safety requirements. Each Ferrino supplier is obliged to report and comply with the product quality plans that provide all the information and compliance and quality requirements requested.

Thanks to a constantly updated system of indicators and evaluations, a ranking is established for the selection of suppliers.

All suppliers are required to sign the Safety Plan, a document that sets out the safety requirements of all materials used, including compliance with REACH, the European regulation governing the use of chemicals in finished products. As we also want to ensure that our suppliers respect our corporate values, we give preference to those with high environmental and social standards, certified by internationally recognised bodies. To date, 96% of our purchases come from product suppliers with at least one certification.

If we consider the volume of purchases from certified product suppliers in the Ferrino product portfolio, we can see, in detail, that 56% of these have Environmental, Social, and Qualitative certifications, 22% have Social certifications, 15% have Environmental certifications, and 7% have only Qualitative certifications.

Another category of strategic suppliers are Value Brand Suppliers, indirect suppliers of high-quality raw materials and components that enable the production of a product with excellent technical performance.

For this category of suppliers too, it is essential that, in addition to their undisputed technical and quality characteristics, they guarantee high environmental and social standards. For this reason, 100% of the raw material suppliers we select have one or more environmental or social certifications.
